PROFILE

I'm a passionate full-stack developer with a strong foundation in building complete web applications from scratch. I enjoy turning complex ideas into clean, scalable, and user-friendly solutions—both on the frontend and backend. My core stack is MERN (MongoDB, Express.js, React.js, Node.js), and I'm experienced with tools like GitHub, Figma, Firebase, and Azure. I thrive in collaborative environments, love solving real-world problems, and continuously push myself to grow through hands-on development.
